Contents Volume 166

1 Editorial: Metaheuristics and worst-case guarantee algorithms: relations, provable properties and applications (ECCO XV)
L.M. Gambardella and S. Martello

3 A $\frac{6}{5}$-approximation algorithm for the two-machine routing open-shop problem on a two-node network
I. Averbakh, O. Berman and I. Chernykh

25 Improved rounding procedures for the discrete version of the capacitated EOQ problem
L. Bertazzi and M.G. Speranza

35 Solving the fixed rank convex quadratic maximization in binary variables by a parallel zonotope construction algorithm
J.-A. Ferrez, K. Fukuda and Th.M. Liebling

51 Core instances for testing: A case study
M. Mastrolilli and L. Bianchi

63 Maximum satisfiability: How good are tabu search and plateau moves in the worst-case?
M. Mastrolilli and L.M. Gambardella

77 A theoretical study on the behavior of simulated annealing leading to a new cooling schedule
E. Triki, Y. Collette and P. Siarry

93 A new fuzzy multiple attributive group decision making methodology and its application to propulsion/manoeuvring system selection problem
A.İ. Ölçer and A.Y. Odabaşi

115 Managing non-homogeneous information in group decision making
F. Herrera, L. Martínez and P.J. Sánchez

133 Sequential selection procedures: Using sample means to improve efficiency
E.J. Chen and W.D. Kelton

154 Threshold based discounting networks: The cost allocation provided by the nucleolus
D. Skorin-Kapov and J. Skorin-Kapov

160 Cluster analysis based on fuzzy equivalence relation
G.-S. Liang, T.-Y. Chou and T.-C. Han

172 A simple method for computation of fuzzy linear regression
M. Hojati, C.R. Bector and K. Smimou

185 Competitiveness of nations: A knowledge discovery examination
S.H. Zanakis and I. Becerra-Fernandez

212 Cost-sensitive learning and decision making revisited
S. Viaene and G. Dedene

221 Mining generalized knowledge from ordered data through attribute-oriented induction techniques
Y.-L. Chen and C.-C. Shen

246 Optimal pricing policies for perishable products
M.F. Anjos, R.C.H. Cheng and C.S.M. Currie

doi:10.1016/S0377-2217(05)00076-7

255 An MCDM model for media selection in the dual consumer/industrial market
N.K. Kwak, C.W. Lee and J.H. Kim
266 When to refinance a mortgage: A dynamic programming approach
P.-T. Lee and D.B. Rosenfield
278 A minimax portfolio selection strategy with equilibrium
X.-T. Deng, Z.-F. Li and S.-Y. Wang
293 An action-research based instrument for monitoring continuous quality improvement
V.R. Prybutok and R. Ramasesh
310 Analysis of assembly systems controlled with kanbans
A. Matta, Y. Dallery and M. Di Mascolo
337 Application of multi-steps forecasting for restraining the bullwhip effect and improving inventory performance under autoregressive demand
C. Chandra and J. Grabis
351 Simultaneous price and due date settings for multiple customer classes
B. Watanapa and A. Techanitisawad
369 A real-time methodology for minimizing mean flowtime in FMSs with routing flexibility: Threshold-based alternate routing
S. Ozmutlu and C.M. Harmonosky
385 Analysis of optimal opportunistic replenishment policies for inventory systems by using a *(s,S)* model with a maximum issue quantity restriction
K.L. Mak, K.K. Lai, W.C. Ng and K.F.C. Yiu
406 Crop succession requirements in agricultural production planning
W.K. Klein Haneveld and A.W. Stegeman
430 Multi-unit auctions with complementarities: Issues of efficiency in electricity auctions
W.J. Elmaghraby
449 Developing concurrent investment plans for power generation and transmission
B. Küçükyazıcı, L. Özdamar and S. Pokharel
469 Discrete bilevel programming: Application to a natural gas cash-out problem
S. Dempe, V. Kalashnikov and R.Z. Ríos-Mercado
489 A clustering algorithm for item assignment in a synchronized zone order picking system
C.-C. Jane and Y.-W. Laih
497 A shortest-path algorithm for solving the fleet management problem in underground mines
M. Gamache, R. Grimard and P. Cohen
507 Static hedging of multivariate derivatives by simulation
P. Pellizzari
520 A distribution-free approach to estimating best response values with application to mutual fund performance modeling
M.D. Troutt, M.Y. Hu and M.S. Shanker
528 Prediction of commercial bank failure via multivariate statistical analysis of financial structures: The Turkish case
S. Canbas, A. Cabuk and S.B. Kilic
547 Advertising in a dynamic spatial monopoly
L. Lambertini
557 Predicting online-purchasing behaviour
D. Van den Poel and W. Buckinx
576 Estimating the market shares of stores based on the shopper's search and purchase behavior
Y.H. Chun and R.T. Sumichrast

593 Editorial: Advances in complex systems modeling
M. Makowski, Y. Nakamori and H.-J. Sebastian
597 Meta-synthesis approach to complex system modeling
J. Gu and X. Tang
615 A structured modeling technology
M. Makowski
649 Some remarks on conflict analysis
Z. Pawlak
655 Behavioral models for complex decision analysis
H. Tamura
666 An intelligent agent model
R. Schleiffer
694 Agent-based simulation for computational experimentation: Developing an artificial labor market
A. Chaturvedi, S. Mehta, D. Dolk and R. Ayer
717 Agent-based approach to complex systems modeling
M. Ryoke and Y. Nakamori
726 Planning vehicle transhipment in a seaport automobile terminal using a multi-agent system
T. Fischer and H. Gehring
741 Agent-based modeling on technological innovation as an evolutionary process
T. Ma and Y. Nakamori
756 MOP/GP models for machine learning
H. Nakayama, Y.B. Yun, T. Asada and M. Yoon
769 Approximating a finite element model by neural network prediction for facility optimization in groundwater engineering
O. Arndt, T. Barth, B. Freisleben and M. Grauer
782 Simulation-based optimization of social security systems under uncertainty
T. Ermolieva
794 Fuzzy fitness functions applied to engineering design problems
E.K. Antonsson and H.-J. Sebastian
812 Refinery short-term scheduling with tank farm, inventory and distillation management: An integrated simulation-based approach
G. Chryssolouris, N. Papakostas and D. Mourtzis
828 On a bi-dimensional dynamic alternative routing method
L. Martins, J. Craveirinha, J.N. Clímaco and T. Gomes
843 Policy evaluations under environmental constraints using a computable general equilibrium model
T. Masui
856 Contents Volume 166
